

GINESYS RETAIL

Empowering Retail

As the Retail Business starts to grow, it becomes increasingly difficult to manage the business effectively without a solution that gives an analytical understanding of critical business parameters. Back office operations gain more importance for successful running of retail business. In this fiercely competitive industry, one is soon out of the show without in depth knowledge of critical business parameters and needs tools to monitor performance in regular intervals. Ordering, Procurement along with Stock Turnover, Prevention of pilferage plays critical roles for success.

GINESYS Retail software is meant for big & serious retailers having either single or multiple stores. The software is ideal of large departmental stores, super markets, hyper markets and Multi Brand outlets.

POWERED BY
ORACLE
